WT Docket No. 11-65

June 16, 2011

Dear Chairman Genachowski and Commissioners:

South Georgia Technical College in Americus of Sumter County, GA is located in the heart of Southwest Georgia. South Georgia Technical College is a residential college offering the latest in technical education and an exciting campus life for every student. Given our technical focus we are excited to consider the possibilities offered by the AT&T and T-Mobile merger.

With the proliferation of 4G LTE, our students will be entering the workforce at a time when wireless communications are enabling more and greater applications that will help them continue their educations, receive job training, and stay in touch with college mentors. Moreover, 4G LTE will enable former students to start and operate businesses, take advantage of e-health applications, and become civically involved. The power to change the world will literally be in the hands of these former students.

4G LTE will even help current students as they prepare for such challenging SGTC majors as Criminal Justice, Culinary Arts, Early Childhood Care and Education, Marketing Management, Practical Nursing, Environmental Horticulture, and many others. At SGTC we are all about incorporating the latest technology to enhance learning and the educational environment.

For the benefit of current and future graduates we implore the Federal Communications Commission to approve the merger of AT&T and T-Mobile, so that the educational process and opportunities for continuing education will be enhanced.

Sincerely,

A handwritten signature in blue ink that reads 'S Reeves'.

Sparky Reeves, President
